

All Things Wild's 2026

SUSTAINABILITY POLICY

INTRODUCTION

Sustainability at All Things Wild is at the heart of everything we do. Every decision we make has an impact on the natural world.

We are committed to:

- Reducing our environmental footprint across all areas of our operations
- Using resources responsibly and minimising waste
- Supporting biodiversity both on and beyond our site
- Inspiring our visitors to make more sustainable choices in their everyday lives

Sustainability is an ongoing journey. This policy outlines the actions we are taking, the progress we have made, and the targets we have set to continue improving.

Because it's not just about us — it's about the future of wildlife and the world we all share.

Our Sustainability Policy reflects our commitments over the following 7 core areas:

1. Biodiversity, Animals and Land Management

2. Energy and Carbon

3. Water Management

4. Waste and Resource Management

5. Sustainable Food and Retail

6. Travel and Transport

7. Sustainability Management and Procurement

BIODIVERSITY, ANIMALS AND LAND MANAGEMENT

We manage our animals and green spaces as a connected living system, where habitats, planting, and animal care work together to support biodiversity and reduce environmental impact.

Our approach focuses on:

- Enhancing native planting and creating wildlife-friendly habitats across the site
- Increasing the use of onsite grown browse to support animal diets and reduce transport emissions
- Managing land in a low-intervention way where appropriate, including wildflower areas and natural grass growth
- Minimising the use of chemicals and prioritising manual or mechanical methods
- Reusing natural materials for enrichment, habitats, and landscaping

Our 2026 targets:

- Add three dedicated pollinator spaces
- Add a further 10m² of browse plantations

ENERGY AND CARBON

We are committed to reducing our carbon footprint by improving energy efficiency, increasing renewable energy use, and reducing reliance on fossil fuels.

Our approach focuses on:

- Improving insulation, lighting, and overall energy efficiency across buildings and enclosures
- Maintain the use of renewable energy, including solar generation
- Reducing unnecessary energy use through improved operational practices
- Monitoring energy consumption to support long-term carbon reduction

Our 2026 targets:

- Reduce total energy consumption by 5-10% against 2025 baseline
- Trial Green Tourism carbon monitoring initiative to see if it will be more usable than current system

WATER MANAGEMENT

Water is a valuable and finite resource. We are committed to reducing consumption and increasing reuse across the site.

Our approach focuses on:

- Capturing and reusing rainwater for non-potable uses such as toilet flushing and irrigation
- Improving efficiency through infrastructure such as dual-flush toilets and flow control
- Monitoring water use to identify leaks and reduce waste
- Encouraging visitors to use water responsibly

Our 2026 targets:

- Reduce overall water consumption by 5-10%
- Add a further water capture system to maintenance barns for reuse of water

WASTE AND RESOURCE MANAGEMENT

We treat waste as a resource and aim to operate under a zero-to-landfill approach, ensuring materials are reused, recycled, composted, or recovered wherever possible.

Our approach focuses on:

- Reducing waste at source through responsible purchasing
- Reusing materials across the site wherever possible
- Composting green waste and using it to support planting and habitats
- Segregating waste effectively to maximise recycling rates
- Diverting non-recyclable waste to energy recovery

Our 2026 targets:

- Maintain zero waste to landfill
- Reduce food waste produced by 5% by reduction of food portion sizes

SUSTAINABLE FOOD AND RETAIL

The products we sell have a direct environmental impact. We aim to source responsibly, reduce waste, and offer sustainable choices to our visitors.

Our approach focuses on:

- Prioritising local, seasonal, and responsibly sourced products
- Working with suppliers who meet recognised environmental and ethical standards
- Reducing packaging and eliminating unnecessary single-use items
- Offering compostable, recyclable, or reusable alternatives
- Encouraging visitors to make more sustainable choices

Our 2026 targets:

- Ensure at least 80% of core products meet sustainability criteria
- Eliminate unsustainable palm oil from our catering outlets

TRAVEL AND TRANSPORT

Travel to and from our site contributes to our overall environmental impact. We aim to reduce emissions by encouraging more sustainable travel options.

Our approach focuses on:

- Promoting public transport options and providing clear travel information
- Encouraging cycling and walking through facilities and incentives
- Reducing business travel emissions where possible
- Transitioning to lower-emission vehicles

Our 2026 targets:

- Maintain and promote at least two sustainable travel initiatives
- Record all fuel use for land train and mowers

SUSTAINABLE MANAGEMENT AND PROCUREMENT

We take a whole-site approach to sustainability, ensuring our actions are measurable, coordinated, and continuously improving.

Our approach focuses on:

- Monitoring performance across energy, water, waste, and other key areas
- Reviewing progress annually and updating targets where needed
- Embedding sustainability into procurement decisions across all departments
- Working with suppliers who demonstrate strong environmental and ethical practices
- Engaging staff and visitors in sustainability initiatives

Our 2026 targets:

- Complete an annual sustainability review tracking key metrics
- Create and maintain a list of approved suppliers with sustainability criteria

CONCLUSION

All Things Wild remains fully committed to managing our park and its assets in a manner beneficial to our planet and its inhabitants.

As we continue to expand and develop, we recognise the importance of sustainability being interwoven within the expansion of our park.

It's with this mentality that we have created these targets for 2026, as we look forward to building on our existing sustainable initiatives.
